Zinc rod anode

Zinc rod anode designed for reliable corrosion protection in saltwater environments. Available in diameters from 20 mm to 150 mm, all with a standard length of 500 mm. Ideal for marine, industrial, and structural applications.

This zinc rod anode is engineered for saltwater applications and provides dependable sacrificial protection for metal surfaces exposed to corrosive marine conditions. Supplied in diameters ranging from 20 mm to 150 mm with a fixed length of 500 mm, it offers flexibility for a wide range of installations such as pipes, hulls, tanks, and underwater structures. Zinc composition ensures optimal performance in saltwater.

For saltwater use only.

Material	Zinc
