Snake grip - Lewis LSG

Fast and efficient cable pulling without special tools! The Lewis LSG Snake Grip is designed for quick and secure installation of new cables or wire ropes using existing lines. Ideal for demanding environments such as oil rigs and drilling platforms.

The Lewis LSG Snake Grip is a versatile cable grip used to pull new cables or wire ropes by attaching them to existing lines. It expands or contracts to fit various cable and wire sizes (0.25–4.25"). The built-in swivel and swing link allow smooth passage through blocks and prevent line twisting during operation. No special tools required, saving time during installation, replacement, and removal. Common applications include oil rigs, drilling platforms, and industrial cable installations. Always secure the ends with banding and tape.

Model	LSG
Brand	Lewis
