Grease - CRC Multi Grease

CRC Multi Grease is a lithiumbased universal grease designed for reliable lubrication of industrial machinery and equipment. It offers good oxidation stability, extreme working penetration and high pressure resistance. Provides effective corrosion protection and is waterresistant up to 90°C.

CRC Multi Grease is a versatile lubricant formulated to deliver longlasting and consistent performance for mechanical components. The lithium base ensures excellent loadcarrying capability and stable lubrication under demanding operating conditions. Key properties include strong oxidation stability, extreme working penetration and robust pressure resistance. The grease protects against corrosion and remains waterresistant at temperatures up to 90°C. Suitable as a multipurpose grease for general industrial maintenance.
