

WD-40 Contact cleaner

Art.no.: 0531093

This Fast Drying Contact Cleaner spray is a non-conductive spray that is suitable for use on all sensitive electrical components. It provides excellent cleaning with minimal fuss, and removes dirt, dust, condensation and flux residue with ease.

Simply spray on and allow the product to dry before powering up. This fast-drying electrical contact cleaner spray is ideal for use on circuit boards, switches, even spark plugs and tape heads. It will remove all the contaminants that cause current leakage and component failure.

In damp conditions it can help chase away condensation for better, more efficient electrical contact, such as in spark plugs and electrical connections in cars.

You can safely use Fast Drying Contact Cleaner on plastics, rubber and metal for superior cleaning.

With the Smart Straw applicator, you've got two ways to spray; use the flip up straw for hard to reach areas, such as inside chains, locks or rollers, then flip it down to use the wide angle spray eye for area coverage on surfaces. Whichever way you need to spray, you can rely on the clever 360° valve to work efficiently at every angle, even upside down.

Features and benefits

- Dual action Smart Straw applicator for wide area and precision spray applications
- Fast active nonconductive cleaner
- Perfect for cleaning electrical equipment, contacts, plastic and rubber
- Penetrates quickly and leaves no residue
- Penetrates in those hard-to-reach areas

Recommended for

- Clean circuit boards
- Remove dust from electrical components
- Clean printers and copiers
- Clean switches and controls
- Remove condensation from spark plugs and electrical assemblies
- Clear tape heads

Brand	WD-40
HS code	34039900
COO	GBR
Sales unit:	PCS
Master packaging (pcs)	6
