Ear muff for helmet - 3M Peltor X5P3

Art.no.: 1212446

The 3M Peltor X5P3 is the highest-attenuation hearing protector in the PELTOR X Series, providing 36 dB noise reduction without the need for dual protection in many applications. Designed for extreme noise environments, it combines outstanding protection with excellent comfort and balance.

The 3M™ PELTOR™ X5P3 is designed for workplaces with very high noise exposure where maximum hearing protection is essential. With an attenuation rating of 36 dB (SNR), it delivers the highest level of noise reduction available within the PELTOR X Series.

Its innovative design combines specially formulated acoustic foam, advanced ear cushions, and optimized ear cup geometry to achieve exceptional sound attenuation while maintaining all-day comfort. Despite its larger ear cups, the X5P3 remains lightweight and well-balanced, helping reduce user fatigue during extended wear.

Manufactured from durable ABS plastic with a TPU-coated exterior, the earmuffs provide excellent protection against wear, impacts, and demanding industrial conditions. The helmet-mounted design makes the X5P3 ideal for construction, mining, transportation, industrial maintenance, and other high-noise applications.

Color	Black
Weight	353.0 kg
Model	X5P3
Brand	PELTOR™
HS code	39269098
COO	POL
Sales unit:	PCS
Master packaging (pcs)	10
