

Waterproof trousers – Oseberg Offshore

These waterproof overalls are made of a strong material that withstands mechanical wear. It is often used at workplaces offshore or in the energy industry, and is certified according to the requirements for limited flame spread (ISO 14116).

Oseberg trousers are cold, oil and grease resistant, and the material is made to withstand mechanical wear. The good tear resistance works even if the garment is wet, and the extra smooth surface makes them easy to clean. The adjustable straps are removable and are attached with a hook.

- Stitched and welded seams
- Adjustable elastic braces, detachable with plastic hook
- 50 mm transfer reflex
