

Coverall winter, antiflame - Offshore

Durable Flame-Resistant Winter Coverall – Built for Harsh Conditions

When safety and comfort must go hand in hand, this flame-resistant winter coverall is the ideal choice. Made from a robust blend of 75% cotton and 25% polyester (290 g/m²), it is treated with Pyrovatex – a durable flame-retardant finish that ensures protection throughout the garment's lifetime.

With a warm 270 g/m² lining and a practical concealed two-way front zipper with storm flap and press studs, this coverall provides excellent insulation and is easy to put on or take off – even with gloves. Offshore-standard reflective tape enhances visibility, while 50 mm sewn-on reflective strips ensure you're seen in all lighting conditions.

Functional and User-Friendly

- Chest pockets with zippers and flaps
- Side pockets with pass-through access
- Back pockets and ruler pocket
- Zipper up to the knee for easy access over boots
- Adjustable cuffs with press studs for a secure fit

This coverall meets the strict requirements of NS-EN ISO 11612 A1 B1 C1 and NS-EN 61482-1-2 (fabric), making it a safe choice for work environments with fire or electrical hazards.
