

ROV-shackle – Gunnebo Retrieve 861

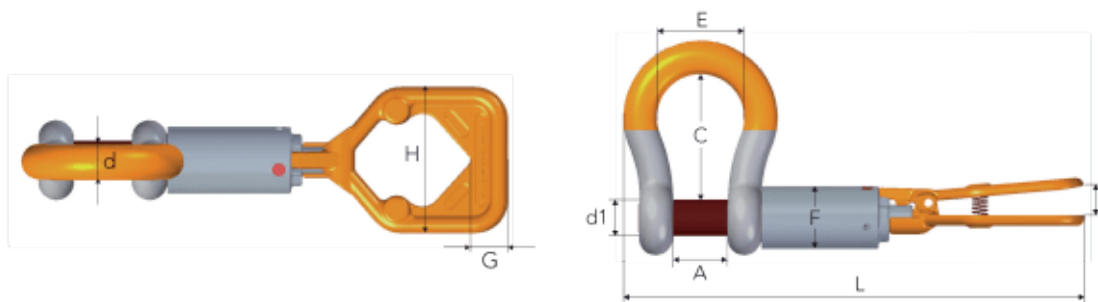

Durable ROV shackle from Gunnebo, designed for demanding offshore lifting and rigging operations. Easy access to locking mechanism and high safety factor make it ideal for subsea use.

The Gunnebo Retrieve 861 ROV shackle is engineered for offshore lifting and rigging operations using remotely operated vehicles (ROVs). Made from high-strength, quenched and tempered steel, with all load-bearing parts hot-dip galvanized for superior corrosion protection. CE-marked and compliant with EN 13889 standard. Operating temperature from -40 °C to 200 °C. Safety factor 6:1.

Warning: Do not heat treat.

Material	Seigherdet høysthetskål, herdet og temperert
