

Eye bolt – RUD ACP TURNADO

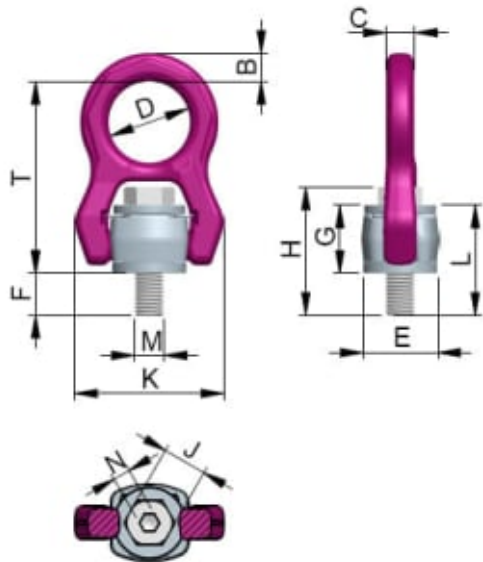

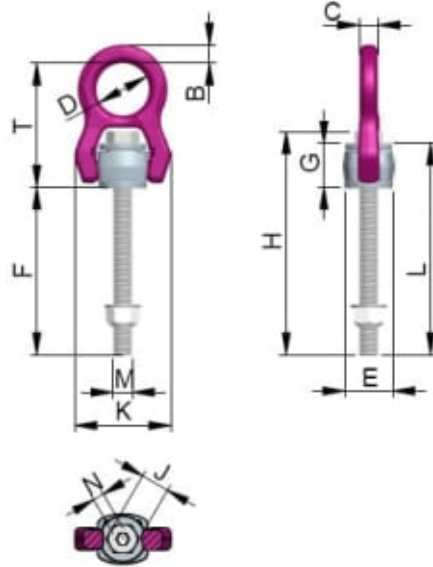

Experience maximum safety and efficiency with the RUD ACP Turnado – the revolutionary lifting eye featuring a unique spring mechanism. Automatic rotation ensures optimal force transfer and eliminates dangerous stops during lifting. With ICE bolt technology and up to 30% higher WLL than comparable designs, ACP Turnado sets a new industry standard.

The RUD ACP Turnado is designed to enhance safety and performance in heavy lifting operations. Its innovative spring mechanism automatically rotates the lifting ring in the optimal direction, preventing transverse loads. Equipped with an integrated RFID transponder for easy inspection, wear indicators for discard criteria, and compliant with ASME B30.26 standards. Available in sizes M8 to M30 with safety factors of 4:1 and 5:1.

Material	Hardened and tempered steel
Material	Herdet og temperert stål
Surface treatment	CORRUD – DT and powder-coated link
Produced in accordance with	Fabrikkstandard
Model	ACP TURNADO
Type	metrical
Brand	RUD
