

Vertical safety lifting clamps for very hard materials – IPU10/H

Flexible plate clamp for lifting, 180° turning, and vertical movement of steel plates and sections with very hard surfaces, up to 47Rc (450HB).

The clamps are equipped with a mechanism that can lock them in both the open and closed positions. The IPU10/H has a hinged lifting eye, allowing the user to lift and position the load from different angles.

Note: Please be aware of the clamp's minimum load. Always read the user manual carefully before use!
