

Long link chain, galvanized – DIN 763

Longlink chain manufactured according to DIN 763. The galvanized surface provides strong corrosion protection, making it ideal for indoor and outdoor use in industrial, agricultural, and construction environments.

This longlink chain is built to the DIN 763 standard and designed for general applications where flexibility and durability are essential. The galvanized finish ensures excellent resistance to corrosion and wear. Suitable for securing, anchoring, and everyday industrial tasks. Not certified for lifting.
