

# Connecting link for chain, galvanized

Galvanized connecting links designed for secure and durable chain coupling. Available in sizes from 3 to 10 mm, suitable for light to heavy applications across industrial, agricultural and marine environments.

These galvanized steel connecting links offer strong, corrosionresistant chain coupling for a wide range of uses. The product range includes sizes from 3 mm to 10 mm, ensuring compatibility with different chain types and load requirements. Designed for reliable performance in demanding conditions.

Suitable for both longlink and shortlink chains.
