

Deck bracket LP-81-B

Art.no.: 0380170

Robust elephant foot designed for securing heavy cargo. The LP81B deck bracket is manufactured from highquality Q355D steel with a primerpainted finish, providing strength and durability for demanding industrial and transport applications.

The Deck Bracket LP81B is a flush cloverleaf socket, commonly referred to as an elephant foot, designed for safe and stable cargo securing where a lowprofile installation is required. The flush design makes it ideal for installation in flat surfaces, providing a secure lashing point without protruding above the deck.

Manufactured from highstrength Q355D steel and finished with a primerpainted coating, the LP81B offers excellent durability and corrosion protection. With a load capacity of up to 2 × 200 kN, it is well suited for heavyduty securing tasks in industrial, transport and maritime environments.

Each unit is clearly marked with ILS and product code, as well as a batch number including production month and year for full traceability.

Weight	7.19 kg
