

Turnfoot D-ring LP-16

Art.no.: 0380430

Dring with ISOcompliant turnfoot base, designed for safe cargo securing under high loads. Robust construction and painted finish make it suitable for demanding industrial and maritime environments.

The Turnfoot ISO DRing LP16 is a heavyduty lashing point from International Lashing Systems, designed for installation in an ISOcompliant turnfoot fitting. The design ensures secure anchoring and efficient load transfer when securing heavy cargo.

The product consists of multiple highstrength steel components: a base made from SCW480, a strap manufactured from Q355D steel, and a Dring produced from 40Cr steel. All components feature a painted finish, providing visibility and surface protection. The Dring is intended for professional use in transport, offshore and industrial applications where safety and reliability are essential.

Each unit is clearly marked with ILS and product code, as well as a batch number including production month and year for full traceability.

Weight	6.09 kg
--------	---------

Material	Forged steel
----------	--------------

Surface treatment	Paintet
-------------------	---------
