

Master link – FRAM Offshore

nøstet &

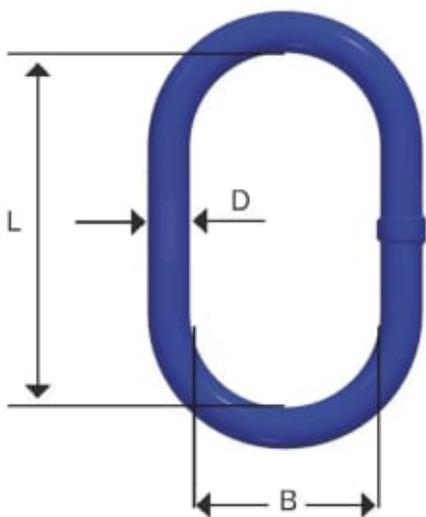

Durable offshore master link made from blue-painted grade 8 steel. Engineered for demanding lifting operations and fully type approved by DNV.

The FRAM Offshore master link is manufactured from blue-painted grade 8 material and complies with NSEN 16774. Designed for offshore applications, it meets the requirements of DNV 2.71, ensuring reliable and certified lifting performance.

FRAM links and lifting heads are type approved by DNVGL according to DNVGL 2.71 and EN 16774. The series is produced up to 70 mm and 84.4 tonnes with a safety factor of 5. All components are tested at 2.5 times the WLL and delivered with full certification.

Color	Blue
Material	Grade 8
Surface treatment	Paintet
Model	Fram offshore
Sales unit:	PCS
