

# Master link hybrid – Gunnebo MFH

Hybrid master link from Gunnebo GrabiQ featuring an engineered flat designed specifically for crane hooks according to DIN 15401 and DIN 15402. Compatible with GrabiQ components and certified to major lifting standards.

The Gunnebo GrabiQ MFH is a hybrid master link equipped with an engineered flat that ensures precise fit and secure engagement with crane hooks compliant with DIN 15401 and DIN 15402. The flat surface improves stability and reliability in heavy-duty lifting operations.

The MFH link is compatible with CL, CLD, CG, and CGD components, with CLD or CGD required for 3 and 4leg chain sling assemblies. Each link is clearly marked with the product type (M), size designation, and H32 manufacturing ID, verified through thirdparty BG audits in Germany. Additional markings include a traceability code and country of origin.

This master link meets the following standards:

- EN 1677:2008 (WLL +25%)
- ASTM A952/A952M02
- AS 3775:2014
- AS 3776:2015

It is built with a 5:1 design factor, offering reliable performance in professional lifting environments.
