

# Pipe hook – FRAM PH

nøstet &

Pipe hook made from bluepainted grade 8 material, equipped with a retaining spring and available with optional rubbercoated surfaces. Designed for safe and efficient paired lifting of pipes.

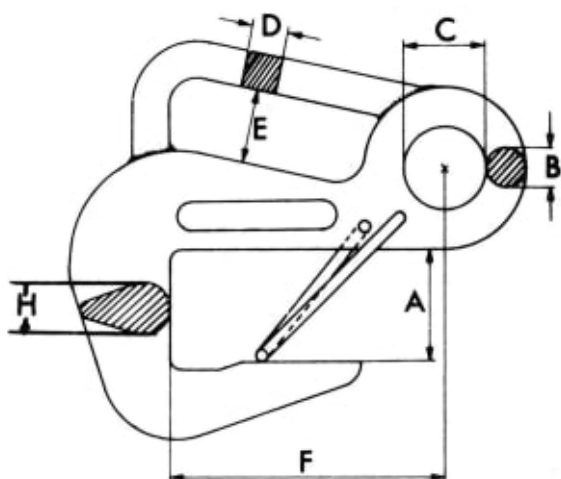

The FRAM PH pipe hook is engineered for secure and stable lifting of pipes in industrial applications. Manufactured from durable, bluepainted grade 8 steel, the hook is equipped with a retaining spring to ensure proper positioning around the load.

Rubbercoated contact surfaces can be supplied on request to increase friction and reduce the risk of damage to pipes and coated materials. The Working Load Limit (WLL) is specified per pair and applies to a working angle of 30°–45°.

Built for long service life and high reliability, this pipe hook is an excellent choice for demanding pipehandling operations.

Color	Blue
Material	Grade 8
Model	PH
Sales unit:	PCS
