

Spring for FRAM PH-hooks

nøsted &

Durable and precise spring latch designed for FRAM PH hooks. Ensures stable and reliable operation of the hook's locking mechanism under demanding conditions.

The spring latch for FRAM PH hooks is engineered to maintain a safe and effective locking mechanism during lifting and handling operations. It ensures proper closure of the hook under load and preserves consistent safety performance.

Built for high durability, the spring latch is suitable for industrial use and any environment where reliable safety components are essential. Easy to install and ideal as a replacement part when maintaining FRAM PH hooks.

Sales unit: PCS
