

ROV hook – GN HK2

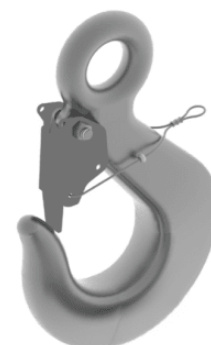

Grade 8 ROV hooks available with either an enlarged eye (HK2E) or standard eye (HK2S). Designed for demanding subsea and offshore operations, featuring an integrated lip and reliable performance in polar temperatures

The HK2 series includes two variants of ROV hooks:

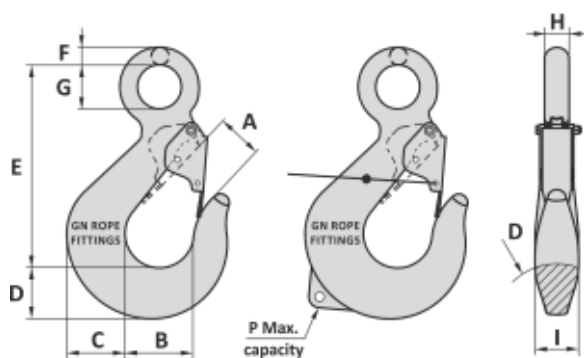

HK2E – Enlarged Eye: Features an enlarged, reinforced eye designed for ROV manipulators that require increased gripping area.

HK2S – Standard Eye: Supplied with a standard eye in accordance with DIN 7540, suitable for general ROV lifting applications.

Both variants are made from painted grade 8 alloy steel with a 4:1 safety factor. They include an integrated lip and wire attachment, with an additional lip available upon request. Temperature rated from -40°C to $+200^{\circ}\text{C}$ and polar rated. Standard documentation includes Certificate of Conformity and 3.1 material certificate according to EN 10204.

Material	Grade 8
Model	HK2
Sales unit:	PCS
