

Container fittings – FRAM CBN

nøstet &

Container bracket made from bluepainted grade 8 steel with 16 mm plate thickness. Designed for 13 mm chain and available with 1 or 3 holes.

The FRAM CBN container bracket is a strong and durable mounting fitting designed for reliable attachment on containers, lifting frames, and heavy structures. Manufactured in bluepainted grade 8 steel with a 16 mm plate thickness, it offers excellent strength, durability, and longterm resistance to demanding environments.

The bracket is designed for 13 mm FRAM chain. The product series includes two variants with either 1 hole or 3 holes, each featuring a 64 mm hole diameter.

FRAM CBN is well suited for industrial, marine, and offshore applications where robust and adaptable mounting solutions are needed.
