

Coupling link – Gunnebo GrabiQ G

Durable Grade 10 coupling link from Gunnebo GrabiQ, made from forged alloy steel. Fatigue tested, powder coated, highly visible, and designed for secure connection with master links and eye hooks.

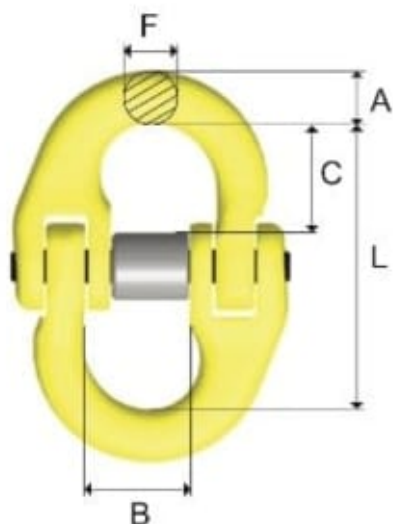

The Gunnebo GrabiQ G coupling link is a highperformance component manufactured from forged alloy steel and coated in a fluorescent yellow powder finish for maximum field visibility. It is fatigue tested and engineered with a pin, spring, and bush design that ensures the locking bush remains secure even if the spring wire breaks.

Clear markings provide country of origin, model, size, grade, and traceability code for safe and compliant operation. Designed for use with master links and eye hooks, the link features a 4:1 design factor for reliable lifting performance.

The coupling link fulfills the requirements of EN 1677:2008 (WLL +25%), ASTM A952/A952M02, and AS 3776:2015.

Color	Yellow
Material	Grade 10
Model	G
Brand	GrabiQ
Sales unit:	PCS
