

Acoustic horn, gas-operated – Lalizas

Art.no.: 0810871

Powerful gasdriven signal horn from Lalizas with an acoustic range of approximately 1500 meters. Reliable, durable, and ideal for marine use in low visibility conditions.

The Lalizas gaspowered fog horn is designed to deliver a loud and clear acoustic signal that can be heard up to 1500 meters away. This makes it an essential safety device for vessels operating in fog, rain, darkness, or any situation where visibility is reduced.

Supplied fully assembled and ready for use, the horn is extremely easy to operate and requires minimal maintenance. Its robust construction ensures longterm reliability in harsh marine environments. Developed by Lalizas, a trusted name in maritime safety equipment, it complies with relevant safety expectations.

Instructions

1. Install the horn by screwing it onto the pressurised container.
2. To operate, press down the horn.
3. The signal horn must always be used in an upright position.

Safety Instructions

- Do not store the pressurised container in direct sunlight.
- Do not expose to temperatures above 40°C.
- Do not pierce or burn the container, even when empty.

Ideal for leisure and professional vessels seeking a powerful and dependable acoustic warning device.
