

# Fire Hose with Storz C Brass Coupling – Guardman

Art.no.: 0860391

The Guardman fire hose with Storz C brass coupling is designed for demanding applications within industry, oil & gas, and fire services. It combines durability, long service life, and secure connections to ensure reliable performance in harsh environments.

Guardman is a type 3 fire hose with an external elastomeric coating, originally known as Armtex, and has set the global standard for fire hoses since the 1960s. The hose is manufactured using a circular weave and is both lined and covered with nitrile/PVC rubber, providing at least five times longer service life compared to traditional textile hoses.

The fire hose is equipped with Storz C brass coupling, ensuring fast, secure, and robust connections during operation. Its construction offers excellent resistance to abrasion, kinking, and puncture while remaining flexible, easy to deploy, and simple to store. Each hose undergoes strict quality control and leakage testing to ensure dependable performance in demanding environments.

## Key Features:

- Storz C brass couplings
- High burst pressure
- High nitrile rubber content
- Long service life and durability
- Easy deployment and storage
- Excellent abrasion, kink, and puncture resistance
- Thorough quality control and leakage testing
- Manufactured from highquality materials

## Standards & Compliance:

- NS 4016/18
- BS 6391
- DIN 14811
- NEN 2242
- Bureau Veritas – Rules for the Classification of Steel Ships
- SOLAS 74 Convention (Reg. II/10, X/3)
- IMO Res. MSC.36(63) and MSC.97(73)
- EN 14540:2014

Length	15.0 mtr
