

# Diamond saw blade for steel

The saw blade is made of high-quality diamond grains sintered together with a metallic binder, giving it unique strength and impact resistance. This unique construction also provides a long lifespan, allowing you to save money by not needing to purchase new saw blades frequently. The DiamondX Vacuum diamond saw blade is designed to cut a wide range of materials, including all types of steel; stainless, acid-resistant, ductile cast iron, steel pipes, rebar, rebar mesh, angle iron, flat steel, railway tracks, Decra, copper, and wood. It also offers high cutting efficiency, enabling you to cut materials quickly and easily.

Model	DiamondX Vakuum
Brand	GOJ
