

Steel wire rope clamp – Iron Grip BG-100

The Iron Grip BG-100 sets the standard for wire fastening. With only 2 clamps per fixation, it ensures maximum strength and efficiency. Symmetrical design allows mounting in any direction. Approved for lifting applications according to EU standards.

The Iron Grip BG-100 is designed for modern wire ropes and heavy-duty lifting. Achieving over 90% of the wire's MBL with just 2 clamps, it reduces material use and speeds up installation. Hot-dip galvanized for superior corrosion resistance and tested for lifting with 1960 N/mm² wire ropes. Complies with EN 13411-3:2400 requirements, ensuring safety and reliability.

Model	BG-100
