

Steel wire rope clamp – Iron Grip BG-S and BG-S SS

The upgraded Iron Grip BG-S wire clamp ensures maximum safety and efficiency. One clamp delivers 100% efficiency for stays and braces, while two clamps provide an approved solution for dynamic lifting. Tested and certified for modern wire ropes (1960 N/mm²) and compliant with NS-EN 13411-3 standard. Suitable for wire sizes 3–5 mm.

Iron Grip BG-S and BG-S SS are designed for secure and efficient wire rope fastening. A single clamp is sufficient for static applications such as stays and braces, while two clamps with proper spacing (at least three times the wire diameter) ensure compliance for dynamic lifting. Tested and approved for lifting applications with modern wire ropes (1960 N/mm²), delivering efficiency above 90% of the wire's MBL. Approved for wire ropes up to 5 mm.
