Lashing strap

A fast, safe, and vehicle-friendly lashing strap with no metal hooks. The endless cam buckle strap is ideal for securing delicate cargo while protecting both your vehicle and equipment.

Designed for quick and reliable load securing without the risk of scratches or crushing force. Its hook-free endless design wraps fully around the load and roof bars, feeding back into the buckle and eliminating metal contact with the vehicle.

The cam buckle is hand-tensioned, allowing precise control and making it the safest choice for fragile cargo such as fiberglass kayaks, surfboards, carbon fiber bikes, and luggage. The fast press-and-pull mechanism ensures efficient loading and unloading.

Beyond transport, the strap is well suited for bundling and organizing items in garages or warehouses, including hoses, extension cords, timber offcuts, or securing drawers during moving. The 25 mm high-tenacity polyester webbing resists UV exposure and moisture, while the aggressive cam teeth ensure a secure, non-slip hold even under vibration.

Material	Polyester
