

# Fender – Polyform HDF

Strong, durable air-filled fenders for commercial crafts. Produced in one piece with extra reinforced rope holds. The HDF fenders are roto-molded from a strong, 8/12 mm thick semi-soft thermo-plastic material. High abrasion resistance and light weight. Resistant to seawater, cleaning agents, common solvents, mineral oil and UV-light.

## Special properties

- Light weight (HDF 9-12 below 30 kgs).
- Easy handling.
- High energy absorption.
- Long service life – high durability.
- Cost efficient.
- Resistant to sunlight.
- Resistant to sea water, mineral oils, cleansing agents and common solvents.
- A one-piece product, no cords or linings that reduces the lifetime.
