

Block – Møllerblock Manrider

Possibly the best manrider block on the market manufactured in accordance with DNV-OS-E101.Oct.2000/ Ch2 Sec.5-1 300 and, with its highly durable construction, is designed for extreme conditions. The side plates and other exposed parts are made of stainless acid-resistant steel, and the block is equipped with an eye for a safety wire, intended for use during installation and dismantling. Additionally, the block features a central roller bearing and grease nipples in connection with the bearing and the swivel suspension to reduce wear. The specified WLL is based on a 10:1 safety factor.
