

Spherical Buoys – Ovun

The Ovun Buoyancy Sphere is designed for applications where limited buoyancy is required. Produced as a single solid unit, the spheres up to Ø 450 mm feature a 50 mm through-hole for rope or wire, ensuring easy handling and safe installation. An ideal choice for maritime and industrial use where reliability and simplicity matter.

The Ovun Buoyancy Sphere is a reliable and versatile float element made for scenarios that require moderate buoyancy capacity. Manufactured as a one-piece unit, it offers strong durability and long service life. Sizes up to Ø 450 mm include a 50 mm center hole suitable for rope or wire attachment, also providing excellent grip for manual handling. Well suited for various maritime, industrial, and technical applications that demand stable floating performance.
