

Assembly paste – Molykote CU-7439

Copper paste that reduces friction and wear during assembly. Withstands high temperatures and pressure loads.

Molykote CU-7439 is a corrosion-protective copper spray with good adhesion and resistant to washing out by water and steam. Molykote CU-7439 is recommended for brake mechanisms, turbines, exhaust bolts, and equipment exposed to high temperatures. Temperature range from -30°C to +650°C.

Min. temp.	-30°C
------------	-------

Max. temp.	+650°C
------------	--------

Brand	Molykote
