Rescue line in plastic container

SOLASapproved throw line supplied in a durable plastic housing. A reliable and effective safety tool designed for quick deployment during manoverboard emergencies.

This throw line comes in a strong plastic housing and is approved according to SOLAS requirements for marine safety equipment. The line is made from durable polyethylene, offering excellent resistance to water, UV exposure, and harsh marine environments. It deploys easily, casts well, and provides buoyancy and stability in the water.

Instructions for use:

1. Pull loose.
2. Hold or stand on the handle.
3. Throw the lifebuoy.

   Always keep the lifebuoy between you and the person in distress.

Suitable for leisure craft, commercial vessels, port facilities, and industrial marine installations. The protective plastic housing ensures easy storage and quick access when needed.

Material	Plastic, Polyethylene
