

Repair kit for safety hooks CL

Spare parts for CL hooks (locking) consisting of 1 trigger, 1 spring, 1 coiled spring pin and 1 assembling device

This repair kit is specifically developed for lockable CL safety hooks. It includes one trigger, one spring, one spiral spring pin and one assembly unit, all engineered for correct fit and straightforward installation. The kit enables easy maintenance and repair, ensuring the hook continues to deliver reliable and safe functionality even in demanding applications. Ideal as a spare part for service and maintenance operations.
