

Rescue safety harness – DBI-SALA® ExoFit™

XE50

3M™ DBI-SALA® ExoFit™ XE50 Rescue safety harness is a robust and reliable fall protection harness designed for demanding rescue and climbing operations. Featuring four strategically placed D-rings (front, back, shoulders), it offers optimal flexibility and safety for work at height. Made from durable polyester webbing and equipped with zinc-plated steel components, including pass-through buckles on both chest and legs, the XE50 is CE-certified (EN361, EN1497) and tailored for use in transport, construction, and general industry.

Key Features:

- Lightweight and durable construction
- Comfortable fit without hip pad or body belt
- Supports user weight up to 140 kg
- Equipped with connected safety ID for easy tracking

Produced in accordance with	EN 361, EN 361
Model	ExoFit™ XE50
