

Positioning Safety Harness – DBI-SALA®

ExoFit™ XE50

3M™ DBI-SALA® ExoFit™ XE50 Harness with Belt is a high-performance fall protection harness built for professionals working in construction, climbing, and work positioning. With four connection points – including D-rings at the waist, back, and front – and integrated padding and belt, the XE50 delivers outstanding support, flexibility, and all-day comfort in demanding conditions.

Key Features:

- Quick-connect chest and leg buckles for fast, secure donning
- Padded waist belt for added comfort and load support
- Made from durable polyester webbing and zinc-plated steel
- Meets EN361 and EN358 safety standards
- Supports up to 140 kg user weight
- Integrated safety ID for tracking and inspection

The ExoFit™ XE50 harness combines ergonomic design with industry-grade performance – the perfect solution for professionals who won't compromise on safety or comfort.

Model	ExoFit™ XE50
