

Safety Harness – DBI-SALA® ExoFit™ XE100

3M™ DBI-SALA® ExoFit™ XE100 Safety Harness delivers the perfect balance of comfort and safety in a lightweight, durable design. Built for climbing applications in construction, transport, and general industry, the XE100 features two connection points (front and back), quick-connect buckles, and targeted padding in the back and leg areas for enhanced wearability.

Key Features:

- Quick-connect buckles on chest and leg straps for fast and easy donning
- Padded back and leg areas for improved comfort during extended use
- Made from durable polyester webbing with zinc-plated steel and aluminum alloy hardware
- Lightweight
- Certified to CE EN361
- Integrated safety ID for inspection and tracking
- Maximum user weight: 140 kg

The ExoFit™ XE100 is the go-to harness for professionals who demand comfort, safety, and efficiency in every shift.
