

# Comfort Rescue Safety Harness – DBI-SALA®

## ExoFit™ XE200

When every second counts, the 3M™ DBI-SALA® ExoFit™ XE200 Rescue Safety Harness delivers the confidence, comfort, and functionality needed in high-risk environments. Purpose-built for rescue, retrieval, and climbing applications, this harness offers advanced design features for both proactive and emergency use.

Constructed with durable polyester webbing and lightweight aluminum hardware, the XE200 features four secure connection points—including shoulder-mounted D-rings designed specifically for vertical rescue operations. Patented Revolver torso adjusters allow quick, precise fitting, while back and leg padding provide comfort during extended wear.

Equipped with auto-locking quick-connect buckles and Connected Safety ID, this harness is CE EN361 and EN1497 certified—ensuring compliance for both fall arrest and rescue situations.

### Key Features:

- Shoulder D-rings for efficient vertical retrieval and rescue
- Auto-locking quick-connect buckles for fast, secure attachment
- Lightweight at just 2.3 kg
- Back and leg padding for enhanced comfort
- Revolver torso adjusters for easy and accurate fit
- Meets CE EN361 and EN1497 standards
  
- 140 kg weight capacity

Produced in accordance with CE EN 361, CE EN 361
