Coverall - Offshore Brelite

The Offshore Brelite is a premium flame-resistant and anti-static coverall designed for demanding offshore and industrial environments. Ventilated panels, lightweight construction and ergonomic design provide excellent comfort, mobility and protection throughout the workday.

The Offshore Brelite coverall is manufactured from Red Wing Flashguard® Brelite™ AR fabric and combines flame-resistant and anti-static protection with exceptional wearing comfort. Knitted FR fabric under the arms and in the back pleats enhances ventilation and freedom of movement.

The garment features nine functional pockets, concealed non-sparking YKK® spiral zippers and covered press studs to ensure that only soft protective material comes into contact with the skin. Double and triple stitched seams together with reinforced stress points improve durability in demanding conditions.

Perforated flame-resistant reflective tape on the shoulders, arms and legs enhances visibility while maintaining breathability. The coverall complies with EN ISO 11612, EN 1149-5, IEC 61482-2 Class 1 and NFPA 2112 standards.

Size	42 - 70
Color	Red, Orange
Weight	160 g/m²
Model	Brelite™
Brand	Red Wing Flashguard®
