

Radiator brush – CoatX CX1

The CX1 radiator brush is designed with a thin and flexible metal ferrule. It is suitable for all types of industrial paint, as well as small tasks, detail work, and precision applications. The special fiber blend ensures an excellent finish and good coverage without fiber shedding, and it withstands strong solvents.

This brush is specifically developed for use with industrial coatings such as epoxy primers, topcoats, epoxy PFP, antifouling paint, and similar products.
