

Bow shackle, sunken hole - Green Pin G-4169

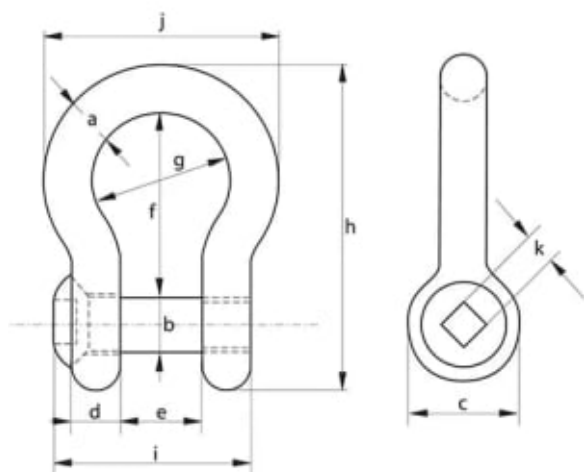

Durable Green Pin® Fishing Bow Shackle FP with a square sunken hole screw pin for a flush finish. No protruding parts, making it ideal for fishing and heavy lifting applications. Hot-dip galvanized for long-term durability and reduced rope wear.

The Green Pin® Fishing Bow Shackle FP is designed with a square sunken hole screw pin (flush pin) to prevent damage to fishing nets and avoid snagging. The chamber in the shackle eye hides the screw thread, reducing rope wear. Made from high tensile steel, Grade 6, quenched and tempered, and hot-dip galvanized for superior corrosion resistance. Suitable for both single-leg and multi-leg systems. Can be assembled using the Green Pin® Sunken Hole Key (sold separately). Complies with EN 13889 and US Fed. Spec. RR-C-271, Grade A.

Note! Key for unscrewing the pin must be ordered separately.

Material	Grade 60
Surface treatment	Hot-dip galvanized
