

Safety barrier – Tensabarrier® 897 Midi

Install the Tensabarrier® 897 Midi Wall Mounted Retractable Barrier onto a desired surface to minimise used floorspace. Ideal for highlighting locations which need to have regularly restricted access. For instance, an elevator undergoing repairs, or a corridor with a wet floor after being cleaned. They are perfect as a permanent solution for any business needing effective access-control products.

- This durable wall unit has an internal steel frame that ensures the components inside are well protected.
- Secure and hard-wearing, it can be mounted onto your desired surface using screw fixings to ensure a long-lasting fixture in your business.
- Woven with high-quality materials, Tensabarrier® webbing is 2x thicker than competitor products, which means it will save you money on replacement products.

Weight	1.43 kg
