

Swivel eye bolt, female – Codipro FE.SEB

The FE.SEB female swivel eye bolt is a single swivel ring. It is equipped with a self-orientation system that always guides it perfectly in the sling direction. It is composed of a GRADUP lifting ring which allows the hook to move parallel to the ring's bearing surface when lifting at 90°. It is designed to perform lifts including load rotation and can be used for any lifting configuration (straight lift, with angle, tilting, rotating).

The FE.SEB lifting ring is designed for use in a temperature range from -20°C to +200°C and carries various markings, including CE, WLL and tightening torque. It is manufactured in compliance with the REACH regulation.
