

# Headlight – LEDLENSER iH5

Art.no.: 0829012

## iH5 Lightweight Headlamp – Powerful and Comfortable

The iH5 is a lightweight headlamp, weighing only 92 grams, that delivers impressive brightness of 200 lumens. Featuring silicone on the inside of the headband, it provides a secure and comfortable fit on your head or helmet.

This industrial-grade headlamp offers a simple lighting program at a very attractive price. It includes a focusable LED diode and can illuminate up to 130 meters for up to 35 hours. The metal clip on the lamp allows you to attach it to clothing or belt, making it easy to use without the headband.

Powered by one standard alkaline AA battery, the iH5 includes a low battery indicator for added convenience. Thanks to the Advanced Focus System, you can easily adjust the beam from wide to narrow with one hand. The lamp is turned on and off via a switch located on the lamp head.

The headlamp offers two light modes: Power and Low Power.
