

Folding ruler, fiberglass reinforced – Hultafors G61

The G61 measuring stick is a durable and moisture-resistant folding ruler made from fiberglass-reinforced polyamide. With clear markings in both millimeters and inches, and joints that lock at 90° intervals, it's ideal for precise measurements in demanding environments.

Made from fiberglass-reinforced polyamide, the G61 offers increased resistance to moisture and wear. It features foil-printed black markings on both sides – metric scale underneath and imperial inches on top. All joints lock at 90-degree intervals for stable and accurate use. This construction makes it suitable for professionals and DIY users who need a reliable and long-lasting measuring tool.

Width	15 mm
Material	Fibreglass
Brand	Hultafors
