

Sheave block – BMM Lazy Line Blokk

Versatile and durable sheave block from BMM, designed for use with both rope and steel wire. Galvanized finish, bronze bushing, and greaseable design ensure long-lasting performance in demanding environments.

BMM lazy line blocks are built for guiding and handling both rope and steel wire in industrial and marine applications. The galvanized surface provides excellent corrosion resistance, while the bronze bushing ensures low friction and high durability. The greaseable design allows for smooth operation and easy maintenance. Ideal for tough environments where reliability and strength are essential.
