

Step ladder, fiberglass

Durable fiberglass step ladder designed for safe indoor and outdoor use. Non-conductive for electrical work, featuring slip-resistant boots, heavy-duty steel hinges, and reinforced steps for maximum stability and safety

This fiberglass step ladder is engineered for professionals and homeowners who demand durability and safety. The 3 mm fiberglass construction ensures non-conductivity, making it ideal for electrical installations. Aluminum components with 2 mm thickness add extra strength. The ladder includes 30 cm step spacing, 34 cm top width, SHOX impact absorption technology, Da Boot slip-resistant feet, heavy-gauge steel hinges, and inside spreader braces. Riveted step construction and gusset bracing guarantee long-lasting performance.

Material	Aluminum, Fibreglass
