

# Cleaner – CRC Lectra Clean II

CRC Lectra Clean II is a powerful solvent cleaner designed to remove heavy contaminants from mechanical parts. With a high flashpoint and extended drying time, it provides safe and effective cleaning, ideal for dip baths and ultrasonic tanks.

CRC Lectra Clean II is a heavy-duty solvent cleaner featuring a flashpoint above 60°C, ensuring improved application safety. Its prolonged evaporation time allows deeper penetration and better dissolution of oil, grease and other tough contaminants. The product is suitable for mechanical components and can be used for manual cleaning, dip baths or ultrasonic cleaning systems.

Typical applications include maintenance of machinery components, workshop cleaning tasks and industrial environments where effective removal of heavy contamination is required.
