

Load binder, long link chain – lever type

Durable and efficient levertype load binder designed for quick and secure tensioning of long link chains. Ideal for transport, machinery, and cargo securing. Available in 9, 11, and 13 mm.

This tension lever is designed for tightening long link lashing chains. It is available in 9, 11 and 13 mm dimensions and manufactured from forged steel combined with bent steel wire, ensuring strength and durability. The surface is primer painted, providing basic corrosion protection. Suitable for maritime, industrial and transport environments where secure chain lashing is required.
