

Safety shoe – Reebok Excel Light Safety IB

1032

Reebok Excel Light Safety IB 1032 is a lightweight and modern safety shoe designed for comfort and performance. Breathable materials, Memorytech insole and BOA lacing system make it ideal for active work environments where comfort and safety are essential.

The Reebok Excel Light Safety IB 1032 is a sporty safety shoe engineered for long workdays with high demands on comfort and protection. It features a lightweight aluminium toe cap and flexible textile puncture-resistant midsole (P) for reliable protection.

The upper is made of highly breathable 3D mesh, combined with ventilating nylon mesh lining to ensure excellent airflow. The Memorytech insole adapts to the shape of the foot, providing personalized cushioning and comfort throughout the day.

The XL Extralight outsole offers lightweight cushioning and soft support, while being antistatic and oil resistant. The outsole is SRC-certified and tested for slip resistance on glycerin-treated steel surfaces. The BOA lacing system allows quick and precise adjustment.

The shoe complies with EN ISO 20345:2011 and is classified as S1P SRC.
