

Ratchet Cover

Art.no.: 0453350

Durable ratchet covers designed for offshore environments to protect equipment and helideck surfaces. Minimize wear, prevent dirt buildup, and extend ratchet lifespan.

These heavy-duty ratchet covers are engineered for harsh offshore conditions where durability and reliability are essential. The cover protects ratchet mechanisms from dirt, salt, and debris that can negatively impact performance and longevity.

An additional key benefit is protection of helideck surfaces. Unprotected ratchets can cause scratches and damage, especially when movement occurs. Using a ratchet cover significantly reduces this risk.

The product also supports proper tensioning of landing net tie-downs. Correct tension is critical, as loose ratchets may move and contribute to damage and wear.

Key Benefits:

- Prevents dirt and debris buildup
- Extends ratchet service life
- Protects helideck surfaces from damage
- Supports correct and secure tensioning
- Suitable for offshore and harsh environments
